**SLR2.5**

- Input: AC 230V/115V, DC 160-375V
- Output: 24V/2.5A
- High overload current, no switch-off
- Quasi-Wide-Range Input
- N+1 redundancy, RDY relay contact
- NEC Class 2 Power Supply

### Input

| Input Voltage | AC100-120/220-240 V (switchable), 47-63 Hz  
                     (85-132 VAC / 176-264 VAC, 160-375 VDC, see also „Output: Continuous Loading“) |
|---------------|----------------------------------------------------------------------------------------------------------------------------------|
| Quasi-Wide-Range Input: With the switch in the 230V position the power-supply unit operates at low and moderate loads at any input voltage between 95 and 264 V AC (see “Output” at the right side).  
Note: At DC input, always leave the switch in the 230V position |
| Input Current | < 1.3 A (switch in 115V position)  
                      < 0.7 A (switch in 230V position) |
| DC Input Current at Open Output | typ. 5.3 mA at 110 VDC, 3.9 mA at 300 VDC (preserves battery sources)  
                      typ. < 25 A at 264 V AC and cold start |
| Inrush Current | To be fused with a 10A, B-type ‘circuit-breaker’ switch based on the usual thermomagn. overload sensing principle (used anyway to fuse the input lines). In addition, the unit contains an internal fuse (not accessible)  
                      (see diagram above) |
| Transient Handling | Transient resistance acc. to VDE 0160 / W2 (750 V / 1.3 ms), for all load conditions. |
| Hold up Time | > 20 ms at 196 VAC, 24 V / 2.5 A (see diagram above) |

### Efficiency, Reliability etc.*

| Efficiency | typ. 86.5 % (230 VAC, 24 V / 2.5 A) |
| Losses | typ. 9.4 W (230 VAC, 24 V / 2.5 A) |
| MTBF | 700,000 h acc. to Siemensnorm SN 29500 (24 V/2.5 A, 230 VAC, T_{amb} = +40°C) |

### Construction / Mechanics*

- **Housing dimensions and Weight**
  - W x H x D: 49 mm x 124 mm x 102 mm (+ DIN rail)
  - Free space for ventilation: above/below 25 mm recommended
  - Right 10 mm recommended (front view)
  - Weight: 470 g

- **Design advantages**
  - Input and output pluggable by means of Combicon® plug connector.
  - Ensure strain relief of the plug connectors when installing the unit.
  - Input and output are strictly apart from each other and so cannot be mixed up (input below, output above).

*For further information see data sheets „The SilverLine“, „SilverLine Family Branches“ and mechanics data sheet.
Start / Overload Behaviour

Start-up delay typ. 0.1 s
Rise time ca. 5-20 ms, depending on load

Overload Behaviour
• Special PULS Overload Design (see right diagram) – no disconnection, no hiccup if overloaded
• High overload current (up to 1.5 I_{nom}), Vout is gradually reduced with increasing current.

Advantages:
• High short-circuit current, giving large 'start-up window': unit starts reliably even with awkward loads (DC-DC converters, motors).
• No 'sticking' such as can occur with fold-back characteristics
• Secondary fuses operate reliably

Further information
Further information, especially about
• EMC
• Connections
• Safety, Approvals
• Mechanics and Mounting
see page 2 of „The SilverLine“ data sheet.

For detailed dimensions
see SilverLine mechanics data sheet SLR2.5/5/10

Power wiring

Output characteristic (min.)

Output Current over Input Voltage (min.)

Hold-up time (min.)

Unless otherwise stated, specifications are valid for AC 230V input voltage, +25°C ambient temperature, and 5 min. run-in time. They are subject to change without prior notice.

Data sheet

Mechanics

SLR2.5 / SLR5 / SLR10

- Innovative DIN-Rail mount, unit holds even at vibration or lateral pressure
- Clearly arranged and user oriented
- Large, robust plug connectors
- Sealed metal housing
- Fine ventilating grid

Connections

- Stable plug connectors, connector size range:
  - 0.2 – 2.5 mm²
  - 0.2 – 2.5 mm², SLR10: 0.2 – 4 mm²
- 12 A each (SLR10: 20 A each)
- 7.62 mm (input) / 5.08 mm (output) distance between adjacent connectors
- SLR10: 7.62 mm (output)

Design advantages:

- All connection blocks are easy to reach as mounted at the front panel.
- Input and output are strictly apart from each other and so cannot be mixed up

Connections

- Input
- Output
- Current handling capacity
- Grid

Overall depth = depth value as mentioned + DIN rail depth

Robust metal housing with fine ventilat. grid (Ø 3.5 mm, IP20), to keep out small parts (e.g. screws)

Mounting on DIN-Rail (TS35/7.5 or TS35/15, 1...1.5 mm thick), thus:
- Simple snap-on system
- Sits safely and firmly on the DIN-Rail
- No tools required to remove or backplane-mounted (two optional screw mounting sets SLZ01 required)
his 'mechanics data sheet' exclusively deals with the mechanical properties of the product. For further information (especially concerning electrical properties), please refer to the generic data sheet of the SLR2.5, SLR5.100 and SLR10.100 and to the basic data sheet „The SilverLine“ dealing with common features of all SilverLine units. This data sheet is subject to change without prior notice.
