

<b>Read this first!</b>	<b>English</b>	<b>Vor Inbetriebnahme lesen!</b>	<b>Deutsch</b>
Before operating this device, please read this manual thoroughly and retain this manual for future reference! This device may only be installed and put into operation by qualified personnel. If damage or malfunction should occur during operation, immediately turn power off and send device to the factory for inspection. The device does not contain serviceable parts. The information presented in this document is believed to be accurate and reliable and may change without notice. For any clarifications, the English translation will be used.			
<b>WARNING</b> Risk of electrical shock, fire, personal injury, or death:			
<p>Turn power off before working on the device and protect against inadvertent re-powering.          Do not open, modify or repair the device.          Use caution to prevent any foreign objects from entering the housing.          Do not use in wet locations or in areas where moisture or condensation can be expected.          Do not touch during power-on and immediately after power-off. Hot surfaces may cause burns.</p>			
<b>A lire avant mise sous tension!</b>			
<b>AVERTISSEMENT</b> Prendre en compte les points suivants, afin d'éviter toute détérioration électrique, incendie, dommage aux personnes ou mort:			
<p>Mettre l'alimentation hors tension avant toute intervention sur celle-ci et s'assurer qu'il n'y a pas risque de redémarrage.          Ne pas ouvrir, modifier ou réparer l'alimentation.          Veiller à ce qu'aucun objet ne rentre en contact avec l'intérieur de l'alimentation (trombones, pièces métalliques).          Ne pas faire fonctionner l'appareil dans un environnement humide ou dans un environnement où il peut y avoir de la condensation.          Ne pas toucher le carter pendant le fonctionnement ou directement après la mise hors tension. Surface chaude risquant d'entraîner des blessures.</p>			
<b>Lea primero!</b>			
<b>ADVERTENCIA</b> Riesgo de descarga eléctrica, incendio, accidente grave o muerte:			
<p>Desconectar la tensión de red antes de trabajar en la fuente de alimentación. Evite una posible reconexión involuntaria.          No realizar ninguna modificación o reparación de la unidad. No abrir la unidad. Evitar la introducción en la carcasa de objetos extraños.          No usar el equipo en ambientes húmedos. No operar el equipo en ambientes donde se espere la formación de rocío o condensación.          No tocar durante el funcionamiento ni inmediatamente después del apagado. El calor de la superficie puede causar quemaduras graves.</p>			

## Product Description

The ML30.106 is a DIN-rail mountable single-phase-input power supply, which provides a floating, stabilized and galvanically separated SELV/PELV  $\pm$  dual output voltage with a common return line. The output of the device fulfills the requirements for a limited power source according to NEC Class 2.

## Intended Use

This device is designed for installation in an enclosure and is intended for commercial use, such as in industrial control, process control, monitoring and measurement equipment or the like. Do not use this device in equipment where malfunction may cause severe personal injury or threaten human life.

## Installation Instructions

Install device in an enclosure providing protection against electrical, mechanical and fire hazards. Install the device onto a DIN-rail according to EN 60715 with the input terminals on the bottom of the device. Other mounting orientations require a reduction in output current.

Make sure that the wiring is correct by following all local and national codes. Use appropriate copper cables that are designed for a minimum operating temperature of 60°C for ambient temperatures up to +45°C, 75°C for ambient temperatures up to +60°C and 90°C for ambient temperatures up to +70°C. Ensure that all strands of a stranded wire enter the terminal connection.

The device is designed for pollution degree 2 areas in controlled environments. No condensation or frost is allowed.

The housing of the device provides a degree of protection of IP20. The housing does not provide protection against spilled liquids.

The isolation of the device is designed to withstand impulse voltages of overvoltage category II according to IEC 60664-1.

The device is designed as "Class of Protection" I equipment according to IEC 61140. Do not use without a proper PE (Protective Earth) connection.

The device is suitable to be supplied from TN, TT and IT mains networks. The continuous voltage between the input terminals and the PE terminal must not exceed 300Vac.

The input can also be powered from batteries or similar DC sources. The continuous voltage between the supply voltage and the PE/ground potential must not exceed 375Vdc.

A disconnecting means shall be provided for the input of the device.

The device is designed for convection cooling and does not require an external fan. Do not obstruct airflow and do not cover ventilation grid!

The device is designed for altitudes up to 2000m (6560ft).

Keep the following minimum installation clearances: 40mm on top, 20mm on the bottom, 0mm left and right side. Increase the 0mm to 15mm in case the adjacent device is a heat source.

The device is designed, tested and approved for branch circuits up to 16A (IEC) or 15A (UL) without additional protection device. If an external fuse is utilized, do not use circuit breakers smaller than 10A B or 6A C-Characteristic to avoid a nuisance tripping of the circuit breaker.

The maximum surrounding air temperature is +70°C (+158°F). The operational temperature is the same as the ambient or surrounding air temperature and is defined 2cm below the device.

The device is designed to operate in areas between 5% and 95% relative humidity.

## Functional Description

The output is electronically protected against no-load, overload and short circuit and can supply any kind of loads, including inductive and capacitive loads.

The  $\pm$ - output voltage is generated by one converter. The sum of both voltages is regulated. The total power of 36W can be drawn asymmetrically or only from one output. It is recommended that the other output should draw a minimum load of 4% of the total load.

Do not apply return voltages from the load to the output terminals higher than  $\pm$ 20V.

A range selection can be done with the jumper on the output terminal block. An inserted jumper sets the output voltage to  $\pm$ 15V. An open connection sets the output voltage to  $\pm$ 12V.

The green DC-OK LED reports a voltage on the output terminals above 19V (sum of both output voltages).

Do not parallel devices for higher output currents.

Do not connect outputs of devices in a series connection for higher output voltages.

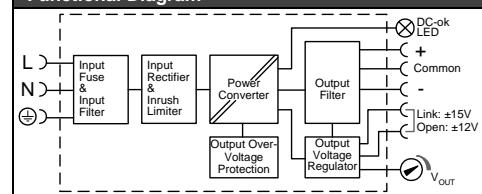

In case of an internal defect, a redundant circuit limits the maximum output voltage to 50V (sum of both output voltages). The output shuts down and automatically attempts to restart.

## Technical Data

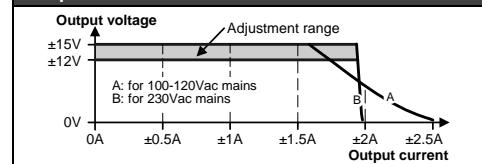

All values are typical figures specified at 230Vac, 50Hz input voltage,  $\pm$ 12V 1.5A output load, 25°C ambient temperature and after a 5 minutes run-in time unless otherwise noted.

<b>Output voltage</b>	DC $\pm$ 12V	Nominal
<b>Adjustment range</b>	$\pm$ 12V – 15Vdc	Factory setting $\pm$ 15V
<b>Output current</b>	$\pm$ 2A, max 36W	Below +60°C ambient
	$\pm$ 1.5A, max 27W	At +70°C ambient
		Derate linearly between +60°C and +70°C
<b>Input voltage AC</b>	AC 100 – 240V	-15% / +10%
<b>Mains frequency</b>	50 – 60Hz	$\pm$ 6%
<b>Input current AC</b>	0.58 / 0.39A	At 120 / 230Vac
<b>Power factor</b>	0.56 / 0.47	At 120 / 230Vac
<b>Input voltage DC</b>	DC 110-300V	-20% / +25%
<b>Input current DC</b>	0.38 / 0.14A	At 110 / 300Vdc
<b>Input inrush current</b>	15 / 32A pk	At 120 / 230Vac, 40°C, cold start
<b>Efficiency</b>	86.0 / 87.0%	At 120 / 230Vac
<b>Power losses</b>	5.9 / 5.4W	At 120 / 230Vac
<b>Hold-up time</b>	54 / 236ms	At 120 / 230Vac
<b>Temperature range</b>	-10 to +70°C	
<b>Max. wire size (litz wire)</b>	2.5mm <sup>2</sup>	
<b>Max. wire size with ferrules</b>	1.5mm <sup>2</sup>	
<b>Wire size AWG</b>	AWG 26-12	
<b>Max. wire diameter</b>	2.3mm	
<b>Wire stripping length</b>	6mm / 0.25inch	
<b>Size (wxhxd)</b>	45x75x91mm	Without DIN-rail
<b>Weight</b>	240g / 0.53lb
