Product Description

The UB-series are uninterruptible power supply controllers (DC-UPS controllers), which are used in combination with a 24V power supply and an external battery modules to bridge power failures. When the power supply provides sufficient voltages, the DC-UPS controller charges the battery. When the power supply voltage fails, the energy stored in the battery is released to the DC bus in a regulated process.

产品介绍

UB 系列是不间断电源控制器 (DC-UPS 控制器), 与 24V 电源和外部电池模块结合使用, 以弥补电源故障。当电源提供足够的电压时, DC-UPS 控制器给电池充电。当电源电压出现故障时, 储存在电池中的能量通过 UB 的调节释放到直流总线上。
